## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-7, drawn to a current control for process variable transmitter, classified in class 455, subclass 67.11.
  - II. Claims 8 and 9, drawn to time of flight ranging system having a transducer for emitting energy pulses and coupling reflected energy pulses, classified in class 342, subclass 124.
  - III. Claims 10-17, drawn to a pulse-echo acoustic ranging system, classified in class 362, subclass 87.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as radar system. See MPEP § 806.05(d).
3. Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as a pulse-echo acoustic sonar system. See MPEP § 806.05(d).
4. A telephone call was made to Gary D. Yacura at 703-390-3030 (phone number had been disconnected) on 5/20/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

*Conclusion*

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
